### Wild Growth<sub>®</sub> Light Oil Moisturizer

Directions: Shake well. Apply sparingly and evenly to hair and scalp just after using or in between applications of Wild Growth® Hair Oil. Comb or brush. For all hair types, this oil is to be used more sparingly than Wild Growthe Hair Oil. For African type hair, also use between Wild Growth® Hair Oil applications when hair and scalp start to become dry and when user determines that it is time of scalp refreshing. For all hair types, use just after applying Wild Growth® Hair Oil. Can also be used exclusively. One bottle can last from 1 to 8 months, depending on hair type (use more for African type hair). Use only as directed. Nonhypoallergenic. Contains: Olive oil, jojoba oil, coconut oil, castor oil, flax seed oil, carrot oil, pumpkin seed oil, grape seed oil, safflower oil, roman chamomile oil, black seed oil, evening primrose oil, vitamin e, Wild Growth® Hair Oil nutrient complex and Wild Growth® essential oil complex, natural fragrance, natural (near colorless) color.

# Recommendations for those who have only used Wild Growth® Hair Oil.

If you enjoy Wild Growth® Hair Oil's hair growth, hair texture softening/thickening/body building, hair repair, moisturizing, hair/skin/nail nourishment, fast and easy blow-dry and press, hair breakage control, lubrication/scalp decongestion, and frizz & fly away control; and desire additional hair benefits: then also use Wild Growth® Light Oil Moisturizer for its additional lasting moisture/lubrication 'anti-friction' conditioning, deodorizing quality and lightness of scent and for even more hair growth, hair repair, hair/skin/nail nourishment, and hair

### <u>Recommendations for those who have only</u> used Wild Growth® Light Oil Moisturizer.

If you enjoy Wild Growth® Light Oil Moisturizer's hair growth, lasting moisture/lubrication 'anti-friction' conditioning, deodorizing quality and lightness of scent, hair repair, hair/skin/nail nourishment, and hair breakage control; and desire additional hair benefits: then also use Wild Growth® Hair Oil for its additional texture conditioning: softness/thickness/hair body, hair styling power with fast and easy blow-dry and press, and frizz and fly away control.

### Wild Growth® Hair Oil

**Directions:** Shake well. For African hair type hair that is at least 4 inches long: use 20 drops for each guarter section of hair. First use 4X 20 drops (80) just on hair alone. Then part hair and squeeze a little with the pointed scalp down every part across whole scalp. Comb or Brush. If hair is short or close to scalp and the scalp can be easily touched with fingers, then 10 drops on each finger tip directly to the entire scalp (one can also follow by sparingly oiling hair surface for conditioning split ends) In all cases, apply 1-3 times per week. Can be used on dry hair and scalp between washings (rule of thumb is: when hair and scalp feel dry to the touch or no shine at all on hair or on finger tips after touching the scalp, then reapply). It is to be used after washing whenever it is washed, on damp (not wet) towel dried hair. A bottle under any circumstance, should last at least 1 month, often 2 months and maybe longer. For Caucasian, Asian Spanish, Middle Eastern and other fine, soft and oily hair types, apply 5-15 drops with finger tips to entire scalp only after every time hair is washed. Apply on damp, towel dried hair. One botte should last from 3-6 months or longer. Comb or brush. Use only as directed. Nonhypoallergenic. Contains: Olive Oil, Coconut Oil, Jojoba Oil, Oleic acids, Triolein, Arachidic Esters, Flavonoids, Monolaurin, Capric acid, Monocaprin, Long Chained Monohydroxyl Groups, Pro vitamin A, Pro vitamin E, Natural Vitamin D, Squalene, Terpenoids, Hydroxytyrosol, Oleuropein, The Aglycone of Ligstrosides, (+)-1acetoxypinoresinol, Pinoresinol, Chloropyll, Carotinoids, Choline, Iron, Magnesium, Phosphorous, Calcium, natural fragrance and natural (amber)
